

Access controls worksheet

	Note(s)	Issue(s)	Recommendation(s)
Authorization /authentication	The accident was caused by user with username "Legal\Administrator" The risk occurs at 8:29 am on the 10th of March in 2023 Computer "Up2-NoGud" was used with the IP address 152.207.255.255.	<i>Robert Taylor Jr</i> has an administrator level of access. He isn't working for the company for almost 4 years. His account shouldn't be active at all	The company should implement access controls: 1. Use the separation of duties principle and least privilege principle – all employees should not have the administrator functions and access 2. Conduct user's accesses audit regularly and do user provisioning/deprovisioning.
